Calvin R. Sudweeks
Executive Secretary
Utah Water Pollution Control Committee
288 North 1460 West
Salt Lake City, Utah 84116-0690

Dear Mr. Sudweeks:

We have reviewed the Bureau's assurance guidelines as outlined in your letter dated January 8, 1987. In general, Sunshine Mining Company cannot see any problems with the requirements as outlined in your guidelines.

Currently, Sunshine does not have any immediate plans to utilize the dispersion ponds for mine discharge water. We want to assure both you and the "Committee" that before any monitor well construction is started we will have met with the Bureau of Water Pollution Control for their final approval of the wells design and location. We will also review, at this time, the Bureau's Quality Assurance Guidance policy to insure that all required well and hydrologic data meet the Bureau's standards, as outlined.

Very truly yours,

Glenn M. Mellor
